WEBSITE DESIGN & DEVELOPMENT

Contrary to the popular belief, Website Design is much more than just coding like HTML or PHP. People today use different devices to access the same content. We ensure the website design and concept is in synergy throughout the different platforms and devices.

Our Process:

1. Identify & Research
   Our design process starts with understanding your brand, needs, business objectives and goals for your website, and developing an appropriate timeline and project plan based on market research

2. Layout/ Customised UX/ UI
   Based on your needs and budgets, we either finalise a layout or develop a sitemap and wireframe of your project from scratch. This helps us define the key features, functionalities, and structure of your new website which allows us to influence our design process.

3. Content Strategy
   Working collaboratively with your team, we determine what content is necessary and useful for your website as well as where it should be placed for maximum

4. Design
   We design the graphics and visual elements needed to bring your website to life.

Services:

- Brand/E-commerce Web Development
- UX/ UI
- Web Application
- Maintenance
- Security
- Hosting and Domain

> It was a pleasure working with Thor Solutions while designing my brand's e-commerce website. The team ensured timely delivery and came up with a beautiful interface. They were flexible and took time to select the right theme. They worked excellently with my designer and this really helped make the process much easier. I highly recommend working with Thor!
